

ADVISORY

Technology advisory services provide organizations with expert guidance and support on leveraging technology to achieve their business objectives. These services include IT strategy development, technology evaluation and selection, digital transformation, cybersecurity, and IT operations improvement. The benefits of technology advisory services include access to specialized expertise, a fresh perspective on business challenges, cost savings, and increased efficiency and productivity.

OUR SERVICES

Our services are designed to provide our customers with a complete solution for their technology needs, from strategy, design, and implementation to ongoing management and support.

- **vCIO**
vCIO (Virtual Chief Information Officer) services offer a flexible, cost-effective solution for businesses seeking to improve their IT operations and achieve their strategic goals.

The goal of a vCIO is to act as an extension of the organization's leadership team, helping them to align their IT goals with their overall business objectives. vCIO brings a wealth of experience and knowledge, providing unbiased recommendations and solutions to enhance IT operations and cybersecurity.
- **vCISO**
vCISO (Virtual Chief Information Security Officer) services provide organizations with access to expert cybersecurity advice and guidance. A vCISO is a senior cybersecurity consultant who works with organizations to develop and implement their cybersecurity strategy, manage cybersecurity risks, and comply with industry standards and regulations. The benefits of vCISO services include enhanced cybersecurity posture, reduced cybersecurity risks, and improved incident response.

ABOUT TDI VERTICAL

At TDI Vertical, we provide holistic, business-focused solutions helping our customers to achieve their objectives, stay competitive, and thrive in an increasingly digital world.

Why Choose **TDI Vertical**?

Security Focused

Our security-first approach is critical to the success of our customers and the longevity of their business. By prioritizing security, we minimize the risk of exposure and protect our customers against modern-day cyber security threats, including data breaches, malware attacks, phishing scams, and ransomware attacks.

Proven Experience

As a trusted advisor, our team provides our customers with valuable insights and recommendations based on our knowledge and industry experience, focusing on business needs, strategy, and growth.

Innovation Driven

TDI Vertical follows a strategic approach to technology selection that involves identifying and evaluating emerging technologies that can provide unique solutions to business challenges.
