

## NETWORK

Network infrastructure is an essential component of any technology-driven organization. It is the backbone of operations supporting critical business services and the foundation for implementing security measures to safeguard against cyber threats and protect sensitive data.

A well-designed and maintained network enables organizations to enhance productivity, improve operational efficiency, and allow innovation and delivery of cutting-edge products and services.

## OUR SERVICES

Our services are designed to provide our customers with a complete solution for their technology needs, from strategy, design, and implementation to ongoing management and support.

- **ENTERPRISE NETWORK**  
Enterprise networks enable seamless communication and data exchange among employees, devices, and systems across multiple locations. As a result, they improve productivity, collaboration, and customer experience while ensuring security and compliance.
- **CAMPUS NETWORK**  
A well-designed and maintained campus network can increase productivity and efficiency, reduce downtime and support innovation.
- **DATA CENTER**  
A properly designed data center network enables fast data transfer, high availability, scalability, security, and simplified IT infrastructure management.
- **CLOUD**  
Cloud networks provide on-demand access to computing resources, storage, and applications, offering organizations scalability, flexibility, and cost-effectiveness.
- **SD-WAN**  
SD-WAN offers centralized management, application-aware routing, cost savings, improved network performance, security, and agility.

## SUPPORTED PLATFORMS

Cisco, Meraki, Aruba, Arista, Fortinet, Palo Alto, VMware, AWS, Azure

## ABOUT TDI VERTICAL

At TDI Vertical, we provide holistic, business-focused solutions helping our customers to achieve their objectives, stay competitive, and thrive in an increasingly digital world.

## Why Choose **TDI Vertical**?

### Security Focused

Our security-first approach is critical to the success of our customers and the longevity of their business. By prioritizing security, we minimize the risk of exposure and protect our customers against modern-day cyber security threats, including data breaches, malware attacks, phishing scams, and ransomware attacks.

### Proven Experience

As a trusted advisor, our team provides our customers with valuable insights and recommendations based on our knowledge and industry experience, focusing on business needs, strategy, and growth.

### Innovation Driven

TDI Vertical follows a strategic approach to technology selection that involves identifying and evaluating emerging technologies that can provide unique solutions to business challenges.
