

SECURITY

Network security measures, such as firewalls, intrusion detection and prevention systems, access controls, encryption, and security monitoring, help to prevent unauthorized access, data breaches, and other security incidents that can cause financial losses, reputational damage, and legal liabilities. Network security is essential for ensuring business continuity, compliance with regulations and standards, and safeguarding sensitive data, making it a top priority for organizations of all sizes and industries.

OUR SERVICES

Our services are designed to provide our customers with a complete solution for their technology needs, from strategy, design, and implementation to ongoing management and support.

- **NEXT GENERATION FIREWALLS**
Next-generation firewalls (NGFWs) incorporate advanced features such as application awareness, intrusion prevention, and threat intelligence to enhance network security and visibility.
- **CLOUD EDGE SECURITY**
Cloud edge security involves securing the perimeter of cloud-based networks to prevent unauthorized access, data breaches, and other security threats.
- **IT / OT SEGMENTATION**
IT-OT segmentation helps secure critical infrastructure, reduce cybersecurity risks, and increase industrial control systems' resiliency and operational efficiency.
- **SECURE ACCESS SERVICE EDGE "SASE"**
SASE provides secure, cloud-based access and connectivity to network resources from anywhere, simplifying management and reducing costs.
- **NETWORK ACCESS CONTROL "NAC"**
Network Access Control (NAC) helps to prevent unauthorized access to networks and devices, enforcing security policies to protect against cybersecurity threats.

ABOUT TDI VERTICAL

At TDI Vertical, we provide holistic, business-focused solutions helping our customers to achieve their objectives, stay competitive, and thrive in an increasingly digital world.

Why Choose **TDI Vertical**?

Security Focused

Our security-first approach is critical to the success of our customers and the longevity of their business. By prioritizing security, we minimize the risk of exposure and protect our customers against modern-day cyber security threats, including data breaches, malware attacks, phishing scams, and ransomware attacks.

Proven Experience

As a trusted advisor, our team provides our customers with valuable insights and recommendations based on our knowledge and industry experience, focusing on business needs, strategy, and growth.

Innovation Driven

TDI Vertical follows a strategic approach to technology selection that involves identifying and evaluating emerging technologies that can provide unique solutions to business challenges.
