

WIRELESS

Wireless networks have become an integral part of modern technology, providing users the flexibility and mobility to access information and communicate from anywhere. This technology has transformed how we work, learn, and socialize, enabling remote access to information and services, increasing productivity, and enhancing collaboration. A well-design wireless network allows organizations to promote a more flexible and dynamic work environment and enable organizations to adapt to changing business needs and technology trends.

OUR SERVICES

Our services are designed to provide our customers with a complete solution for their technology needs, from strategy, design, and implementation to ongoing management and support.

- **ENTERPRISE / CAMPUS**
Wireless networks enable employees to work remotely, collaborate efficiently, and access network resources from anywhere, improving productivity and business agility.
- **OUTDOOR**
Outdoor wireless allows devices to communicate wirelessly over long distances in outdoor environments.
- **PtP – POINT-TO-POINT**
PTP wireless network provides a dedicated link between two points, enabling fast and efficient data transfer. It is ideal for applications that require high-bandwidth, low-latency connections, such as video streaming, remote monitoring, and teleconferencing.
- **PtMP – POINT-TO-MULTIPOINT**
PtMP wireless network allows multiple devices to communicate with a single access point. It is suitable for applications such as wireless Internet service provision, smart cities, and Internet of Things (IoT) networks.
- **RF ARCHITECTURE / SURVEY**
The Wireless RF (Radio Frequency) architecture is a critical component of wireless network design, ensuring optimal performance and reliability.

SUPPORTED PLATFORMS

Cisco, Meraki, Aruba, Mist, Fortinet, Siklu

ABOUT TDI VERTICAL

At TDI Vertical, we provide holistic, business-focused solutions helping our customers to achieve their objectives, stay competitive, and thrive in an increasingly digital world.

Why Choose **TDI Vertical**?

Security Focused

Our security-first approach is critical to the success of our customers and the longevity of their business. By prioritizing security, we minimize the risk of exposure and protect our customers against modern-day cyber security threats, including data breaches, malware attacks, phishing scams, and ransomware attacks.

Proven Experience

As a trusted advisor, our team provides our customers with valuable insights and recommendations based on our knowledge and industry experience, focusing on business needs, strategy, and growth.

Innovation Driven

TDI Vertical follows a strategic approach to technology selection that involves identifying and evaluating emerging technologies that can provide unique solutions to business challenges.
